

MASS VACCINATION ON A COLLEGE CAMPUS

MICHELLE CAMARENA, MSN, RN
 AMY SAULS, PHARM.D, BCACP, CPP
 UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

INDICATIONS FOR MASS VACCINATION

- Widespread indication for vaccine**
 - Annual influenza vaccine
 - COVID vaccine
- Outbreaks**
 - Meningococcal disease
 - Mumps
 - Pertussis

POTENTIAL TARGET GROUPS

- Health science students, volunteers
- Front-line employees
- Athletes
- Students and employees with underlying health conditions
- Students and employees with potential or known exposures

Advantages of a Mass Clinic

- Visible**
- Maximize efficiency**
- Mobilize – not a fixed location**
 - Advantage during COVID to allowing patients to access vaccination outside of health care setting
- Accessible**
 - Walk-in versus appointment-based
 - Variety of days and hours

It's a Team Effort!

- Environment Health and Safety/Local Health Dept.
- RN and PharmD student volunteers
- Health science schools
- Athletics
- Coupons from campus bookstore
- Campus contract employees

Lessons Learned

- COVID-specific planning: distancing, PPE, sanitization of supplies
- Collection of patient information
- Scanning of insurance cards
- Input into electronic health record
- Internet connection, power helpful
- Record keeping
 - Report out data
 - Use one lot number
 - Patient-accessible documentation

Lessons Learned

- ▶ Hours in afternoons, weekends
- ▶ Be creative with locations
 - ▶ Loading dock areas
 - ▶ Breezeways
 - ▶ Tents
 - ▶ Office buildings
 - ▶ Residence halls
 - ▶ Gymnasiums
 - ▶ Practice facilities
